

001524
Indigo

Overview

The Indigo is a lightweight key box with a large storage capacity. It has the Snap Shut locking mechanism, which permits to lock the key box without using the lockbox key. Indigo attaches easily to the side window of any vehicle. It can be used at car dealerships, car rental companies, long term parking, service centers,... . Permanent mount version also available.

Construction and installation

The Indigo is made out of a special aerospace aluminium alloy, which makes it lightweight. A Dry Lock Lid shields the lock mechanism from corrosion due to dirt and moisture while the padded foam back prevents damage to the vehicle window. The Indigo attaches easily to the window of any vehicle with a stainless steel hanger which is securely riveted to the key box. No tools are needed to install the Indigo: just slip it over the window and roll up the window again to securely lock it. The permanent mount version is mounted to the wall with the appropriate plugs and screws (not included).

Operation

Open the Dry Lock Lid to reveal the lock. Insert the Title key and turn the key 90° clockwise. Now you can remove the Title key, by turning it 90° anti-clockwise again. Open the lid and remove the vehicle key for use. Closing the lid of the key box, will lock it automatically because of the unique Snap Shut lock function.

Applications

Car manufacturers, industrial fleet, parking & valet services, coach companies, service centers, distribution centers, car dealerships, leasing companies, hire car companies, import/export centers, auction houses, car clubs,...

Guidelines

We recommend that you do not let the keys inside the key box at night. Remove the keys and leave the key box open. Please remember that Indigo is a convenience product and not a security product.

Standard Features

- Ultra lightweight material
- Durable construction
- Large storage capacity
- Snap Shut locking mechanism: no key required to close the key box
- Patented Title key lock, uniquely customized per customer
- Easy mounting or replacement of Title key cylinders
