

154144
Max

Overview

Do not lose time searching for car keys! Keep the keys with the vehicle by using GE Security Supra Max. The Max attaches easily to the side window of any vehicle. This keybox has proven its worth in the automotive market for years. It can be used at car dealerships, car rental companies, long term parking, service centers,...

Also available for permanent mount (Industrial Max).

Construction and installation

The Max is made out of durable zinc alloy. A Dry Lock Lid shields the Title lock mechanism from corrosion due to dirt and moisture while the padded foam back prevents damage to the vehicle window. The Max attaches easily to the window of any vehicle with a stainless steel hanger which is securely riveted to the key box. No tools are needed to install the Max: just slip it over the window and roll up the window again to securely lock it.

Operation

Open the Dry Lock Lid to reveal the lock.
Insert the Title key and turn the key 90° clockwise.
Open the lid and remove the car key. Turn the Title key 90° anti-clockwise to secure the lid again.

Applications

Car manufacturers, industrial fleet, parking & valet services, coach companies, service centers, distribution centers, car dealerships, leasing companies, hire car companies, import/export centers, auction houses, car clubs,...

Guidelines

We recommend that you do not let the keys inside the keybox at night. Remove the keys and leave the keybox open. Please remember that Max is a convenience product and not a security product.

Standard Features

- Attaches easily and without damage to the window of any vehicle
- Patented secure Title key lock mechanism, uniquely customised per customer
- Durable construction
- Easy to use
