DISTRIBUTED BY

SMALL INVESTMENT, BIG PROFIT

The Verifive, the instant Euro banknote detector, designed and manufactured by Photovox brand, helps you avoid damage provoked by counterfeit banknotes. A small investment which will enable you save your profits in an easy, instant and totally reliable way. Withdrawing counterfeit money is a loss. Verifive can be an essential ally for your work.

Verifive will also be a deterrent for fakers and it will make your customers more relaxed.

SMALL SIZE, ALWAYS AT HAND

Verifive is a vertical unit with a compact footprint thus utilizing a small area from your cash area. Simple and easy to use, it is sufficient to connect it to the adaptor and it is ready to be used. A special care to the consumption: Verifive goes to the stand-by mode after a minute of inactivity and it will automatically switch on again when a banknote is inserted or when you shortly press the button low right on the display.

FREEDOM OF MOVEMENT

An optional rechargeable internal battery is available to allow you to use Verifive without branching it to the mains.

ZERO MISTAKES

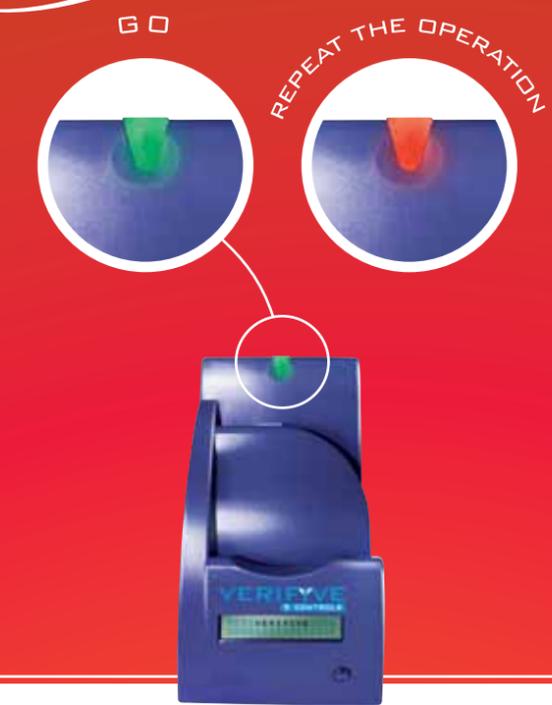

Speed, simplicity and reliability: these are the prerogatives of Verifive. The display and its lights will allow you to verify the authenticity of the banknotes in less than one second. To use it is sufficient:
1. Insert the banknote in one of its four possible orientations;
2. Green light and recognition beep, or red light; The inserted banknote value appears on the display. If the banknote is not recognized, please repeat the operation and, in case, kindly ask the customer to replace the banknote.

SECURITY FOR EVERYONE

ONLY 11 CM PER SIDE

BANKNOTE HOLDER

Modern design: you can insert the banknotes one at a time (at most ten) and pick them all at the end of the verification. Only one movement to save precious time.

Verifive is secure as it checks **5 security features** at the same time.

Verifive does **not make mistakes**. If the parameters are not recognized, the banknote isn't validated and on the display you can read "REPLAY": so you must check it again.

Verifive is really **easy** and **intuitive**: it is enough to insert the banknote in one of the four possible directions and in less than one second it will check 5 parameters. The green light, together with the beep, show that the banknote is genuine; the red light shows that the banknote hasn't been recognized.

Verifive is fit for small spaces. Its vertical structure takes up a small surface and thanks to its **ergonomic design**, it allows to check up to ten banknotes in a row, and to pick them all together at the end of the check.

Verifive is a **totally safe** product as it is produced in Italy by Photovox technology. It's guaranteed for **two years**. It's produced with recyclable materials and according to the CE regulations.

IN 5 CHECKS

VERIFIVE HAS BEEN TESTED AND APPROVED AS SECURITY DEVICE BY THE EUROPEAN CENTRAL BANK.
